If you want to have access to more camera settings from your phone. There are a couple of options that we recommend.

- Filmic Pro is an app that will give you access to using 4k Video, change your frame rate, control your white balance, exposure and much more. The app has a one time cost of \$14.99.
- The second option that is available only on iPhones is ProMovie Recorder. This is a similar version to FilmicPro and the full version cost only \$2.99.
